1. Module Overview

Registra is a Dolibarr module published by PEREL. It enables you to create events, publish a public registration form, manage participants, generate invoices for paid events, and track attendance in real time.

1.1 Global workflow

From event creation to attendance tracking, Registra automates the entire registration process.

Registra registration workflow overview

1.2 Key features

- Event creation and configuration: title, date, venue, capacity, pricing
- Public registration form, no Dolibarr account required, unique link per event
- Individual (natural person) and organisation registrations
- Multiple participants per registration with badge management
- Automatic matching to existing Dolibarr records — no duplicates
- Standard Dolibarr invoicing for paid events
- Pricing codes: VIP, partner, free...
- Attendance tracking and KPI dashboard
- Excel exports: participants, question answers, labels / badges

1.3 Requirements

Item	Detail
Dolibarr	16.0 or higher
Required rights	read / write / delete on the Registra module
Technical user	registra_system (create from module settings)
Payment module	Optional — Registra uses already installed payment modules

1.4 Installation

1. Download the module ZIP from Dolistore.

2. In Dolibarr: Configuration > Modules/Applications > Deploy an external module.
3. Upload the ZIP file, then activate Registra in the module list.
4. Open the module Settings and configure the technical user.

Tip: on first activation, click "Create the registra_system user" in the module settings. This account is required for public forms to create registrations, third parties, and invoices inside Dolibarr.

2. Configuration

2.1 General settings

Setting	Description
Technical user	Account used by public forms to create registrations, third parties and invoices. Select or create registra_system.
Public base URL	Optional. Fill in only if the external form URL differs from the internal Dolibarr URL (proxy, reverse proxy).

2.2 User rights

- registra/read — read access to the event list and event pages
- registra/write — create and edit events
- registra/delete — delete events with zero participants

3. Creating and Managing Events

3.1 Event list

Go to Registra > Event list. Click CREATE AN EVENT to create a new event.

 Registra - Events

CREATE EVENT

Ref	Title	Date	Location	Type	Price / participant	Public	Mode	Participants	Active	Action
REG260703-1930-SOIREEDETE	Soirée d'été	07/03/2026 07:30 PM	Vieux Port à Marseille	Paid	30.00	Mixed	Multiple	32	Yes	
REG260523-1330-EVENT	AfterWork	06/16/2026 06:30 PM	Aix en Provence	Paid	15.00	Mixed	Multiple	0	Yes	

3.2 Configuring an event

Click CREATE AN EVENT to open the configuration form.

The screenshot shows the 'Create event' form with the following sections:

- Status:** A checkbox for 'Active / registrations open' is checked.
- Event information:**
 - Title:** A text input field.
 - Date:** A date and time picker set to 05/24/2026 at 08:19:19.
 - Location:** A text input field.
 - Capacity (optional):** A text input field with a note: 'Empty = unlimited. Capacity counts all registered participants: paid, pending, free and guests.'
 - Additional information (optional):** A large text area for a 'Free text displayed on the public registration page'.
 - Image (optional):** A 'CHOOSE AN IMAGE' button and a note: 'No image selected. JPG, PNG or WEBP'.
- Organizer contact:**
 - Name:** 'Perel'
 - Email:** 'perel.editor@gmail.com'
 - Phone:** A text input field.
 - Address:** A text input field.
- Additional fields:**
 - Custom questions for the public form:** A table with 2 fields. Each field has a 'Question' (e.g., 'Are you looking for an apprentice?'), an 'Answer type' (Short text), a 'Required' checkbox (checked), and 'Options / possible choices' (Required only for dropdown lists and checkboxes). Actions include 'Duplicate' and 'Delete'.
 - + ADD A QUESTION** button.
- Registration settings:**
 - Allowed registration type:** 'Individuals and companies'.
 - Number of participants:** 'Multiple participants'.
- Pricing:**
 - Pricing type:** 'Free'.
 - Unknown person:** 'Do not create anything'.

A 'SAVE' button is at the bottom right of the form.

Event creation form

General information

Field	Description
Label *	Event name shown on the public form
Date *	Date and time of the event
Venue	Address or venue name
Capacity	Leave empty for unlimited. Counts all participants (paid, pending, free, guests)
Additional info	Description shown on the public form
Image	Optional. JPG, PNG or WEBP — displayed at the top of the public registration form. Maximum accepted size depends on your server's PHP configuration.

Organizer contact

This section is pre-filled with your organisation's information as configured in Dolibarr. You can modify it independently for each event.

Field	Description
Name	Organizer or organisation name
Email	Contact email displayed on the public form
Phone	Contact phone number displayed on the public form
Address	Address displayed on the public form

The organizer name, email, phone, and address are visible to participants on the public registration form.

Registration settings

Setting	Options
Allowed type	Individuals only / Organisations only / Both
Number of participants	Single participant (1 per registration) or Multiple participants

Pricing

Setting	Description
Pricing type	Free or Paid
Unknown person	Paid events: Refuse registration / Create a prospect / Create a customer
Standard price / participant	Default price applied to each participant
Payment	Immediate mandatory or Deferred (payment link after registration)

Warning: pricing codes and payment KPIs are automatically hidden for free events.

Pricing codes

A pricing code replaces the standard price for an entire registration. Example: code VIP2026 at 0 € allows free registration at a paid event. The code is entered at the identification step.

Additional fields (Custom questions)

Additional fields allow you to collect specific information from participants during registration (dietary requirements, special needs, how they heard about the event...).

To add a question, click + ADD A QUESTION. Each question is configured with:

- A question label
- A response type: Short text, Drop-down list, or Checkboxes
- Mandatory or optional

Answers to additional fields are exportable from the event page via the "Export answers" button. The generated Excel file contains one column per configured question, in addition to registration information.

4. Public Registration Form

4.1 Public link

Each event generates a unique link, visible at the top of its admin page:

[https://\[your-dolibarr\]/custom/registra/public/inscription.php?event_id=XX](https://[your-dolibarr]/custom/registra/public/inscription.php?event_id=XX)

Shareable by email, QR code, or embedded in a website. Accessible without a Dolibarr account.

The form shows your organisation logo, event details (date, venue, price) and remaining spots if a capacity is set.

4.2 The 4 or 5 registration steps

The screenshot shows a public registration form titled "Soirée d'été". At the top, it displays event details: date "07/03/2026 07:30 PM", venue "Vieux Port à Marseille", and price "30 € / participant". The Perel logo is in the top right. Below the header, there are four steps: "1. Identification", "2. Participants", "3. Summary", and "4. Confirmation", with "1. Identification" being the active step. A message indicates "Remaining places : 28". The form is divided into two main sections: "Identification" and "Contact person". The "Identification" section includes a dropdown for "Registration type" (set to "Organisation"), a text field for "Organisation name *", a text field for "Company number", and three text fields for "Email *", "Phone", and "Postcode". The "Contact person" section includes text fields for "First name *", "Last name *", "Contact email *", and "Contact phone". A green "Continue" button is at the bottom left of the form. The footer of the form says "Powered by PEREL".

Public form — Step 1: Identification (Organisation mode)

Step 1 — Identification

Depending on the registration type allowed by the event:

- Individual: first name, last name, email, phone, postal code, city
- Organisation: company name, SIREN/SIRET, email, phone, postal code, city + contact person

Registra automatically searches for an existing Dolibarr record to prevent duplicates.

Step 2 — Participants

For multi-participant events: add each participant with first name, last name, position/role and badge text.

Step 3 — Additional fields (if configured)

If custom questions are configured for the event, a dedicated step is inserted here. The participant answers the questions before proceeding to the summary. If no questions are configured, this step is automatically skipped.

Step 4 — Summary

Full overview of the registration and total amount. The participant can go back and edit before confirming.

Step 5 — Confirmation

Dolibarr automatically creates the invoice (paid event). Depending on configuration:

- Immediate payment: a payment link is shown on screen
- Deferred payment: instructions to pay later are provided

5. Tracking and Dashboard

5.1 KPI indicators

📄 Event - REG260703-1930-SOIREEDETE

Public registration link : https://crm.cpme13.fr/custom/registra/public/inscription.php?event_id=11

Event dashboard — 31 participants, €870 invoiced, €780 collected

KPI	Description
PARTICIPANTS	Total registered participants
PAID	Participants with a paid invoice (+ number of paid invoices)
PENDING	Participants with an unpaid invoice
INVOICED REVENUE	Total invoiced amount (all invoices)
COLLECTED REVENUE	Amount actually received + outstanding balance
GUESTS	Participants manually added from administration, not invoiced
PRESENT	Participants marked as present + attendance rate

Payment KPIs (INVOICED REVENUE, COLLECTED REVENUE, PENDING) are automatically hidden for free events.

5.2 Adding a guest

From event administration, add guests manually. They have "Guest" status: no invoice generated, not counted as pending payments.

5.3 Closing an event

Once the event is over and attendance has been recorded, uncheck the "Active / registrations open" box on the event page. This closes the public form: no new registrations will be accepted.

Closing the event does not delete any data. Registrations, invoices and statistics remain accessible and exportable.

5.4 Attendance management

Attendance management is designed to be used on the day of the event, at the welcome desk. It allows you to check in real time:

- Whether the participant is registered
- Whether their payment has been made
- Their role or position (useful for badge handout)

On the event page > Participants section, check the Present column for each participant as they arrive. Then click the "Save attendance" button to confirm.

Attendance can also be entered after the event, once it is over, in order to feed the KPIs and obtain complete statistics.

Attendance directly feeds the dashboard KPIs (number present, attendance rate) and is included in the

Participants export. It allows you to analyse the gap between registered and present participants after the event.

6. Excel Exports

6.1 Participants export

Column	Content
Third party	Company name (organisation) or empty (individual)
First name / Last name	Participant identity
Position / Role	Role entered at registration
Badge text	Text to print on the badge
Registration type	Individual / Organisation / Guest
Invoice	Dolibarr invoice reference
Amount per participant (€)	Price share attributed to this participant
Invoice amount (€)	Total invoice amount for the registration
Payment status	Paid / Pending / Free / Guest
Payment date	Collection date if paid
Present	Yes / No

6.2 Answers export

Column	Content
Invoice	Dolibarr reference
Registration date	Date and time of registration
Third party	Name or company name
Third party email	Contact email
Invoice amount (€)	Total invoiced
Main participant	First name + Last name
Total participants	Number of participants in the registration
+ dynamic columns	One column per configured custom question

6.3 Labels / Badges export

Excel file optimised for badge mail-merge. Contains for each participant: First name, Last name, Position/role, and Badge text.

7. FAQ

Can I delete an event that has participants?

No. Deletion is blocked as soon as one participant is registered, to prevent accidental loss of registrations and associated invoices.

Does the public form work without a Dolibarr login?

Yes. Anyone with the link can register without a Dolibarr account. All operations are performed by the `registra_system` user in the background.

Will an existing Dolibarr contact be duplicated?

No. Registra first searches for a matching record by email, phone, or name. If found, the registration is linked to it.

Are pricing codes single-use?

No. A code can be reused any number of times. Uncheck it from the event page to disable it.

Is Registra compatible with multi-entity setups?

Yes. Registra respects the Dolibarr entity system. Events from one entity are not visible to others.

8. Glossary

Term	Definition
Participant	Individual registered for an event, linked to a registration
Guest	Participant manually added by an administrator, without invoicing
Registration	Record grouping one or more participants, linked to a Dolibarr third party and an invoice

Term	Definition
Third party	Dolibarr entity (individual or organisation) linked to the registration
Pricing code	Code replacing the standard price for an entire registration
Technical user	registra_system account used by Registra for public form operations
KPI	Key performance indicator displayed on the event dashboard
